## About me

---

I understand what it is like to struggle with understanding confusing ideas.

Studying secondary education at the Sydney Boys High School, I was never one who was strong at academics. I would waste my time playing video games. In year 9, my rank was 198/210. But by year 12, I was rank 9, achieving 99.85 ATAR, and state rank #7 in maths extension 1.

### What changed?

The focus. I saw how concepts that I've learnt could connect seamlessly with other ideas. This development of conceptual understanding extends beyond just mathematics, but for almost all aspects of life. At UNSW, I studied BVisSci/MClinOptom for 3 years, before taking early exit with a final WAM of 92. I am currently studying Doctor of Medicine at the University of Melbourne, with a 99 percentile GAMSAT.

## My Teaching Philosophy

Success isn't accidental. It follows a proven three-step cycle.

# 01

## Concepts

Building strong, intuitive conceptual understanding from the ground up.

# 02

## Practice

Providing targeted practice questions to reinforce and solidify new knowledge.

# 03

## Adaptation

Analyzing mistakes to adapt strategies and ensure continuous growth.

## My Services:

I am in fairly high demand, and I only offer 11 spots for tutoring. The available spots I have are listed below:

- Private High School Homework Help -- **Full**
- GAMSAT (S2 and S3) -- **3 spots**
- Interview Preparation -- **2 spots**

For more information like prices, please visit the Services page.
